

Vaccination,
the best protection

Québec 

Vaccination at age:	Appointment on:
2 months	
4 months	
6 months	
12 months	
18 months	
between 4 and 6 years of age	

The risk of catching many diseases is very high in the first year of a child's life.

To better protect your child, do not forget any vaccination and have the vaccination done at the recommended ages.
